...

In the uses clause of a program or library, any unit name may be followed by the reserved word in and the name of a source file, with or without a directory path, in single quotation marks; directory paths can be absolute or relative.

...

In the uses clause of a unit, you cannot use in to tell the compiler where to find a source file. Every unit must be in the compiler's search path.

```
uses
  lib_unit
  {$IFDEF LIB_VERS_2}in '/vers2/lib_unit.pas'{$ENDIF}
  {$IFDEF LIB_VERS_3}in '/vers3/lib_unit.pas'{$ENDIF}
;
```
