.....

```
LibPostgreServer pgJDBC;  
pgJDBC.copyIn("COPY " + table + " FROM STDIN WITH (FORMAT text, DELIMITER '" +  
delimiter + "', ENCODING 'WIN1251') ", sb.toString());
```

```
public final long copyIn(String query, String str) {  
    long copyRows = 0;  
  
    try (ByteArrayInputStream in = new ByteArrayInputStream(str.getBytes())) {  
        Connection conn = LibPostgreServer.getConnection().unwrap(BaseConnection.class);  
        CopyManager copyManager = new CopyManager((BaseConnection) conn);  
        copyRows = copyManager.copyIn(query, in);  
        closeConnection(conn);  
    } catch (Exception ex) {  
        LibLogger.logMessageThrown(LibLogger.SEVERE, null, ex);  
    }  
}
```

```
}  
return copyRows;  
}
```
