doc\README.services_extension5) Services API extension - using services with non-default security database.
(Alex Peshkov, peshkoff@mail.ru, 2013)

If one wants to use services API to access database which is configured to use non-default security database, new SPB item `isc_spb_expected_db` should be used when attaching to services manager. Value of this item is a database which is expected to be accessed.
