LF+LF).

```
let lastKeyTime = 0;  
let lastKey = "";
```

```
window.addEventListener('keydown', function(event) {  
  const currentTime = performance.now();  
  const isEnter = event.key === 'Enter' || event.keyCode === 13;
```

Enter?

```
  if (isEnter && lastKey === 'Enter') {  
  
    const timeDiff = currentTime - lastKeyTime;
```

```
    if (timeDiff < 50) {
```

```
      console.warn('LF+LF blocked...');
```

```
      // reSet timer
```

```
      lastKeyTime = currentTime;
```

```
      return;
```

```
    }
```

```
  }
```

```
  lastKey = event.key === 'Enter' ? 'Enter' : event.key;  
  lastKeyTime = currentTime;
```
